

Main Service Entrance AC Surge Protection

SP 330

Citel's SurgePurge 330 model provides surge suppression capability for your facility's service entrance for both conducted (10/350µs) and induced (8/20µs) transient overvoltages originating from severe lightning and utility switching events. These protectors incorporate Citel's reliable high intensity modules with individually monitored and fused MOVs. Designed to provide rugged, high quality surge protection at the most critical points within a facility's distribution system.

Applications

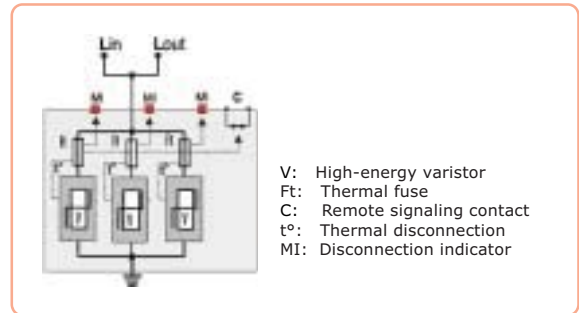

- Service entrance master distribution switchboard
- Facility located on heavy industrial power grid
- Motor Control Centers

Standards & Guidelines

UL 1449 2nd Edition	USA
IEC 61643-11	International
ANSI/IEEE C62.41	USA
NFC 61740-95	France
VDE0675-6	Germany
CSA C22.2	Canada

Service Entrance Protection

- 330kA transient amps protection (8/20µs)
- 60kA transient amps protection (10/350µs)
- Heavy-duty busbar, modular construction
- Multi-redundant protection circuit per phase
- Full On-Board Diagnostics— Dual stage fault indicators, remote & audible alarms
- 60A, 200kAIC fused disconnect switch
- 10-Year warranty
